Version 1.0.0  
-----

Korean\_Style\_Bar is a 3D material asset for creating 3D game backgrounds.

By using this, you can create game backgrounds without using 3D model creation tools.

## ■Contents

This is a background model for a game set in a Korean-style bar.

It is a lightweight model that is easy to use.

Package contents

- Bar interior
- L-shaped bar counter
- Round table
- Round stool
- Wall-mounted TV
- Liquor bottles
- Cardboard boxes
- Beer server
- Neon sign

You can also freely assemble rooms depending on the combination.

The package contains 3D assets for composing rooms.

For a list of all parts and examples of creation, please refer to the demo\_sample scene.

## ■How to use

There are prefabricated assets that have been placed,  
so you can use them as they are for the game background.

You can also move the furniture in the prefab to create a different layout.

You can also use the meshes individually.
